JKV Global Capital Markets Services Ltd.

RISK DISCLOSURE STATEMENT

This notice is provided to you because you are considering dealing with JKV GLOBAL MARKETS LTD ("JKV") (hereinafter "the Company") in Foreign Exchange Contracts, Contracts for Difference, deposits and payments products and other Derivatives Contracts ("Transactions") either on a margin basis or otherwise.

This notice cannot and does not disclose or explain all of the risks and other significant aspects involved in dealing in these Transactions and was designed to explain in general terms the nature of the risks particular to dealing in these Transactions and to help the Client to take investment decisionson an informed basis.

Prior to applying for an account you should consider carefully whether trading in these Transactions is suitable for you in the light of your circumstances and financial situation. Margin FX and CFDs involve different levels of exposure to risk and, in deciding whether to trade in such instruments, you should be aware of the following points:

Trading in Margin FX and CFDs ("OTC Derivatives") carries a high degree of risk. The "gearing" or "leverage" involved in trading OTC derivatives means that a small initial margin payment can potentially lead to large losses in excess of your initial investment. The geared nature of derivatives also means that Margin FX and CFDs trading can carry greater risks than conventional share trading, which is generally not geared.

A relatively small market movement can lead to a proportionately much larger movement in the value of your investment, and this can work against you as well as for you.

Most OTC derivatives are off-exchange derivatives. This might be considered to involve greater risk than an on-exchange derivative as there is no exchange market on which to close out an open position – you are only able to open and close your positions with us. Accordingly, you are exposed to the unlikely event that we may not be able to fulfill our obligations to you as a counterparty.

Foreign markets will involve different risks to markets. The potential for profit or loss from OTC derivatives relating to a foreign market or denominated in a foreign currency will be affected by fluctuations in foreign exchange rates. It is possible to incur a loss if exchange rates change to your detriment, even if the price of the instrument to which the OTC derivatives relates remains unchanged.

Margin FX and CFDs are contingent liability transactions which are margined and require you to make a series of payments against the purchase price, instead of paying the whole purchase price immediately, and they may only be settled in cash.

You may sustain a total loss of the margin that you deposit with us to establish or maintain a position. If the market moves against you, you may be called upon to pay substantial additional margin at short notice. If you fail to do so within the required time, your position may be liquidated at a loss and you will be liable for any resulting deficit.

You will be deemed to have received a notice requiring the payment of such funds, even if you are not at home or do not receive the messages we leave for you, if the notices are delivered to your nominated contact points.

Even if a Margin FX and CFD is not margined, it may still carry an obligation to make further

payments in certain circumstances over and above any amount paid when you entered into the contract.

Under certain trading conditions it may be difficult or impossible to liquidate a position. This may occur, for example, at times of rapid price movement if the price rises or falls in one trading session tosuch an extent that trading in the underlying market is suspended or restricted.

Placing a Stop Order will not necessarily limit your losses to the intended amounts, because market conditions may make it impossible to execute such an Order if the underlying market moves straight through the stipulated price.

We will not provide you with personal financial product advice relating to Margin FX and CFDs and we will not make Margin FX and CFD recommendations of any kind. The only advice we will give you will be as to how Margin FX and CFDs work.

There is no clearing house for Margin FX and CFDs, and the performance of a Margin FX and CFD by JKV GLOBAL MARKETS LTD is not 'guaranteed' by an exchange or clearing house.

Our insolvency or default may lead to your positions being liquidated or closed out without your consent. As all deposits lodged with us are held in a segregated client account or accounts, in such circumstances those deposits would attract all legal protections afforded under the applicable laws.Net unrealized running profits are also held in trust by us (in excess of our contractual and regulatory requirements) and would normally be similarly protected for your benefit as beneficial owner, unless aCourt were not to uphold the trust in relation to the net unrealized profits, in which event you would rank as an unsecured creditor of ours in relation to such net unrealized profits. It should also be notedthat keeping your funds in a segregated client account does not offer or guarantee absolute protectionof your funds in the event of our insolvency or default where there is a deficit in the segregated client account.

Although by dealing with us you will not be dealing in securities; you need to be aware that you may still be subject to the applicable laws.

The obligations to you under the Client Agreement and the margin FX and CFDs are unsecured obligations, meaning that you are an unsecured creditor of ours.

EA POLICY: In order to make EA trading available clients have to submit a request and acknowledge that they will confirm in advance that they wish to use an EA during account opening or before starting to implement such a strategy. There is no additional charge for this mode of trading. JKV GLOBAL MARKETS LTD reserves the right to reverse orders that are executed using EA methods on accounts that are not labelled as EA accounts or where the necessary advance confirmation has not been given.

These cases will be investigated by us and the client advised via e-mail or telephone where possible to notify the client of the trades being cancelled. We will use our best endeavors to ensure that the reversal does not result in an unintended position beinggenerated however this cannot be guaranteed. I.e. if the order is executed and subsequently reversedto open a position, any subsequent order(s) closing this position would also be reversed leaving the net P&L at zero so the client is not disadvantaged by this reversal due to our onward transmission of invalid prices.

Although we mitigate the risk of invalid prices feeds reaching clients through utilizing a price aggregation system which generates a price from multiple liquidity providers (typically in excess of 10 liquidity providers), there are rare occasions where the prices can become "skewed". In such rare instances if orders are filled at these prices, we reserve the right to reverse orders where misquoted prices have been struck. These cases will be investigated by us and the client advised via e-mail or telephone where possible to notify the client of the trades beingcancelled. We will use our best endeavors to ensure that the reversal does not result in an unintendedposition being generated however this cannot be guaranteed. I.e. if the order is executed and subsequently reversed to open a position, any subsequent order(s) closing this position would also be reversed leaving the net P&L at zero so the client is not disadvantaged by this reversal due to our onward transmission of invalid prices.

2.13 Stale quotes and misquotes policy: JKV Global Capital Market's quoted prices may on rare occasions become "stale" or "skewed".
